

TUFLOW PRODUCTS SOFTWARE LICENCE AGREEMENT SCHEDULE B (MI-ALL): miTools Pricelist May 31st, 2017

Please contact sales@tuflow.com for a written quote. To help us assist you, please specify any preferences you have on:

- Licence Type (Local or Network) and number of licenses (1, 2, 4 etc).

Purchase Options:

MiTools is only available as a perpetual licence. The software is provided with an indefinite expiry date plus an optional annual software upgrade and support fee.

Licence Types:

1. **Local Licence:** TUFLOW simulations can only be run on the computer hosting the Lock.
2. **Network Licence:** The Lock is hosted on any computer (e.g. a server). Other computers check out licences from the host computer via the local area network (LAN).

What is MiTools?

MapInfo and TUFLOW Productivity Utilities (miTools) licences are a suite of utilities automating many of the common repetitive tasks required to develop a TUFLOW model in the MapInfo development environment. The utilities also enable efficient creation and visualisation of key TUFLOW model inputs/outputs within the MapInfo environment

How many instances can be used at the same time?

Each instance of MapInfo will use an instance (licence) of miTools. For example, a Network 4 will allow 1 miTools instance on 4 separate computers at any one time.

Are there ongoing costs?

Yes, if you wish to access our support services and keep your perpetual licence maintained to access the latest software upgrades and releases, an annual invoice for 20% of the value of your perpetual licences is issued in June of each year. At the time of the initial purchase, the annual fee is pro-rated to next June.

Are discounts available for multiple licences?

Our price structure heavily discounts purchases of multiple licences. The more licences you own, the cheaper the per licence rate. In addition, a discount is provided for multiple Local Licences of the same product by the same Licensee (i.e. one point of contact for all invoicing).

What miTools functionality is included?

Please refer to the mitools brochure for a full list of included functionality:
